

MORRIS

BUILT ON THE TOOLS.

Developer Brief

A practical guide to what Morris is, what it does, who it serves, and how it looks.

Company	Morris Construction Tech Ltd
ICO Registration	C1923529
Domain	morrisapp.co.uk
Founder	Darren Morris — UK duct fitter
Audience	UK tradespeople, sole traders, small contractors
Document	Developer brief / handoff spec

01 OVERVIEW

What Morris Is

Morris is a dark-themed, mobile-first construction administration platform for UK tradespeople. It replaces the spreadsheets, Word templates, and back-of-the-van scribbles that tradesmen lose money on every week with a single tool that generates compliant, signed, branded paperwork in seconds.

It is built by a tradesman, for tradesmen. Every tool exists because a real subbie, sole trader or small contractor said "I waste an hour on this every job." Morris does that hour in 60 seconds.

"The paperwork sorted. You stay on the tools."

02 FUNCTION

What Morris Does

- Generates 88+ industry-specific documents (RAMS, COSHH, CIS invoices, quotes, variations, site diaries, snagging lists, etc.) using Claude AI seeded with the user's profile, trade, and inputs.
- Auto-populates every document with the user's company name, address, UTR, CIS status, VAT number, insurance details, and bank details — no "[Your Company]" placeholders ever.
- Stamps every document with a unique document reference (e.g. **RAMS-DM-260530-001**) and saves it to a tamper-evident Vault automatically.
- Embeds the user's electronic signature on every PDF and prints a **[SIGN HERE]** box for client counter-signature where required.
- Tracks jobs end-to-end: each job has a status (active / invoiced / completed / disputed) and every generated document attaches itself to the job.
- Calculates the tax pot, CIS refund forecast, VAT threshold position, and HMRC-compliant mileage in real time as the user logs work.
- Sends paperwork to the client via Email, SMS, WhatsApp text, or WhatsApp PDF straight from the tool screen.
- Three "wow" shortcuts: **Verbal to Variation** (talk into the mic on site, get a written variation), **Photo to Document** (snap evidence, get a written log), **CIS Refund Predictor** (instant refund estimate).
- Team management: invite mates with role-based access (Owner / Admin / Manager / Member), seat-limited by plan. Enterprise gets full white-label branding on every PDF.

03 USERS

Who It Serves

Sole-trader tradesman	32 trades from electrician to duct fitter. On-site, on a phone. Needs to look professional and get paid fast.
Small contractor (2–10 staff)	Managing subbies, RAMS, payment cycles, and HMRC compliance without an office team.
Apprentice / new starter	Needs admin scaffolding to look professional and stay compliant from day one.

**Construction company
(Enterprise)**

Multi-site operation. Wants white-label branded paperwork, full team roles, and audit-ready records.

What It Looks Like

Aesthetic: Cinematic dark. Workshop steel. Construction-site honesty with high-end design polish. No fluff, no corporate jargon, no slop.

Token	Value	Used for
Background	Near-black #060606	Primary surface across every page
Accent	Gold #E8A020	CTAs, brand strokes, kicker labels, signature lines
Text	Off-white #F0EDE8	Body copy and headings on dark
Muted text	#A19D94	Sub-copy, hints, helper text
Wordmark font	Bebas Neue	All logos and display headings
Body font	DM Sans	Paragraphs, forms, tool fields

Signature UI motifs

- Cinematic 5-second gold-shimmer intro on the landing page — “Built By A Tradesman, For Tradesmen.”
- Collapsible left sidebar with 7 accordion sections: Documents, Finance, Site Tools, Price Work, Sole Trader, Contractors, Account.
- Global K / Ctrl+K command palette — type to jump to any of the 88+ tools or pages.
- Tool screens use a left-aligned form column and a right-aligned generated-document preview with 7 action buttons (Save / Copy / PDF / Email / WhatsApp text / WhatsApp PDF / SMS).
- Branded PDF letterhead with the user's company name, address, and (Enterprise) custom logo on every output.
- Yellow gold asterisks ARE NOT used to block users — Morris never stops a tradesman from generating a document, even with empty fields.

Tool Catalogue (88+ tools)

Tools are grouped into 7 categories in the sidebar. The full catalogue:

Documents (compliance, contracts, letters)

- RAMS (Risk Assessment & Method Statement)
- COSHH Assessment
- Toolbox Talk
- Noise Assessment
- Manual Handling Assessment
- Working at Height Rescue Plan
- Health & Safety Policy
- Hire Agreement (CPA 2011/2021)
- Subcontract Letter
- Variation Letter / Order
- Extension of Time (EOT) Claim
- Practical Completion Certificate
- Snagging List
- Complaint Letter
- Progress Report
- Quote Builder
- Scope of Works
- New Starter Pack
- Apprentice Manager Pack
- HMRC Correspondence

Finance

- CIS Invoice (HMRC-compliant)
- Payment Chaser (Late Payment Act 1998)
- Quote Builder
- Variation Letter
- EOT Claim
- Practical Completion Cert.
- Earnings Tracker (income tax + NI bands)
- VAT Threshold Monitor
- Mileage Tracker (HMRC 45p/25p split)
- Tax Pot Calculator
- CIS Refund Predictor
- Job Tracker (status + linked docs)

Site Tools

- Site Diary
- Daywork Sheet
- Timesheet (CIS-aware)

- Photo Evidence Log
- Verbal Instruction Recorder (CVI letter)
- Photo to Document
- Verbal to Variation
- Subbie Compliance Checker
- Toolbox Talk
- Snagging List

Price Work

- Quote Builder
- Scope of Works
- Variation Letter
- Daywork Sheet
- Practical Completion
- Subcontract Letter

Sole Trader

- Self Assessment Prep
- CIS Refund Predictor
- Tax Pot
- VAT Threshold
- Mileage Tracker
- Earnings

Contractors / Subcontractor Tools

- Subbie Compliance Checker
- Subcontract Letter
- Hire Agreement
- RAMS
- COSHH
- Right to Substitution clause
- Insurance & CSCS expiry tracker

Account

- Profile (CSCS card photos, signature pad, bank details, UTR, VAT)
- Team Management (invites, roles, seats)
- Billing (Stripe self-serve + portal)
- Document History / Vault
- Favourites
- Trade switcher
- Share My Profile (one-tap branded trade-profile PDF)
- Offline Mode (drafts queue when offline)
- Company Checker (Companies House lookup)

Three Wow Features

Verbal to Variation

Tradesman taps the mic on site, speaks the change request (“client wants two extra sockets and the run moved 3m left”), and Morris produces a formatted variation letter with cost and time-impact analysis, ready to send.

Photo to Document

Snap a photo of damage, a stamp, a defect, or a hand-written instruction. Claude vision OCRs and describes it. The user picks the target document type and Morris formats the evidence into a numbered chain-of-custody log or attaches it to a variation.

CIS Refund Predictor

User enters CIS gross and total deduction. Morris instantly forecasts the refund (gross minus basic-rate tax on profit above the personal allowance) and a Self Assessment 31 January countdown banner shows what's left to file.

07 COMMERCIAL

Subscription Tiers

Plan	Price	Seats	Built for
Free	£0	1	Trial use: 3 tools / 5 docs per month
Solo	£29.99 / month	1	Sole traders. Unlimited everything for one user.
Business	£59.99 / month	5	Small crews. Up to 4 invites.
Pro	£99.99 / month	10	Scaling teams. Admin + Member roles.
Enterprise	£249.99 / month	Unlimited	Full white-label, all 4 roles, concierge onboarding.

Stripe Checkout handles every subscription. Customer Portal is wired in for self-serve card update, invoice history, and cancellation.

What Morris Will Achieve

- **Save tradespeople 5–10 hours of paperwork per week** by replacing manual document drafting with AI-generated, compliance-baked outputs.
- **Get tradespeople paid faster** via professional, signed, branded invoices with Late Payment Act language and Customer Portal-style payment chasers.
- **Cut HMRC risk** with auto-calculated CIS, VAT-threshold tracking, contemporaneous mileage records, and a clean Vault for every document ever sent.
- **Make small contractors look enterprise-grade** via white-label branding, role-based team management, and audit-ready document references.
- **Build a defensible UK SaaS niche** by combining 88+ trade-specific tools, AI generation, and HMRC-aware workflows in one mobile-first app no generic admin tool can match.

09 TECHNICAL CONTEXT

Notes for the Website Developer

Morris is a full-stack web app. The marketing site lives at the same domain.

- **Frontend:** React (Create React App), Tailwind CSS, lucide-react icons, sonner toasts, jspdf, react-router-dom v7.
- **Backend:** FastAPI (Python) + Motor (MongoDB).
- **AI:** Claude Sonnet 4.5 via Emergent Integrations — every document is generated server-side from a prompt that injects the user's profile.
- **Payments:** Stripe Checkout (live keys), subscription mode, Customer Portal for self-serve management.
- **Email:** Resend for transactional + admin notifications. Sender domain: hello@morrisapp.co.uk (DKIM pending verification at handoff).
- **PDFs:** Generated client-side with jspdf using a branded letterhead. Enterprise users can upload a logo that swaps the Morris wordmark.
- **Auth:** bcrypt + opaque session token; sign-up requires OTP. Team invitations sent via Resend with a 14-day token link.
- **Hosting:** Currently deployed via Emergent. Live URL: <https://morrisapp.co.uk>.

Brand assets the developer needs

- Logo: gold/black Morris wordmark in Bebas Neue (vector preferred — contact Darren).
- Colour palette: #060606 (background), #E8A020 (gold accent), #F0EDE8 (text), #A19D94 (muted text).
- Fonts: Bebas Neue (display, free), DM Sans (body, Google Fonts).
- Tone of voice: blunt, plain-English, no jargon. “Built on the tools”. “Built by a tradesman. For tradesmen.”
- Hero copy already in use: “The paperwork sorted. You stay on the tools.”

Page list a marketing developer should build / mirror

- Landing (hero + 5-second cinematic intro, What Morris Offers, 88+ tools grid, 4-tier pricing, Founder block, Footer with ICO C1923529).
- Sign up / Log in (OTP-verify + trade selection on first login).

- App shell with sidebar + dashboard “Command Centre” (tax pot, refund, outstanding invoices, expiry traffic lights, quick actions, recent documents).
- Profile (CSCS upload, signature pad, bank details, UTR, white-label logo upload for Enterprise).
- Billing (4 plan cards + Stripe checkout + Manage subscription portal button).
- Team Management (invites, roles, last-active timestamps).
- Tool pages (one shared template renders ~75 of the 88 tools from a config file).
- Job Tracker list + detail.
- Accept-invite public page.
- Privacy / Terms / Contact — to be drafted.

10 HAND-OFF

Closing

Morris is live in private beta. The app, the brand, the cinematic intro, and 88+ tools are already shipping. What we want from the website developer is a marketing-grade public site that matches the in-app aesthetic, drives signups, and tells the story of the founder — a UK duct fitter who built the tool he wishes he had.

Questions? Email Darren at contact@morrisapp.co.uk.
